01 — Cover letter

Dear Ms. Nadja,

Thank you for your time on the 3 August call, and for the tour through the Odoo system.

We heard you clearly. An upfront fee of AED 30,000–40,000 is too much cash to tie up for a five-person team. You want a subscription instead. So we changed the deal. You pay AED 9,850 at Kickoff, not AED 30,000+. The build work is bundled in. You can read the whole deal on one page — see §02.

The figures, what is included, and our service promise are all below. The legal terms sit in the Master Service Agreement and Service Level Agreement (SGC MSA & SLA v2026.08). We sign this together with the Order Form when you are ready to proceed.

With kind regards,
SGC Tech AI

02 — Executive summary

This is the page to read if it is the only page you read.

What the deal looks like in one page

Item	Value
What you get	Odoo subscription, version-pinned; build, hosting, backup, support, account management, 30-day hyper-care, two training sessions, quarterly business review.
Service tier	Growth (includes 3 users)
Term	24 months from Kickoff
Subscription Fee	AED 1,650 / month
Billed	AED 4,950, quarterly in advance
At Kickoff	AED 9,850 (Mobilisation 4,900 + Q1 4,950)
Year 1 total	AED 24,700
Full 24-month commitment	AED 44,500

You can decide from this page alone. The sections after this explain what is included, how the payments work, and what is not part of the deal.

03 — Understanding your business

Von Geyern Real Estate L.L.C is a Dubai mainland brokerage operating near Dubai Islands. Here is what we learned on the 3 August discovery call:

- You run a five-person team today. You expect to add more agents by the end of the year, as the market picks up.
- You have tried other systems before. Your team stopped using them within two months. Your worry is not whether the software works. Your worry is whether people will actually use it.
- You want one simple platform. Listings, leads, deals, commissions, tenancies, contracts, invoices, and maintenance — all in one place, not ten different tools.
- You prefer a subscription over a one-time payment. You want to start with cash in hand, not a big cheque out the door.
- You asked about three things on the call. We priced them as Phase 2 — see §12: Property Finder / Bayut / Dubizzle portal sync, a "request brochure" button on your website, and AI lead scoring.

04 — Proposed solution

This proposal is an **Odoo subscription**. SGC Tech AI builds it and supports it, start to finish. Your version is **pinned**: the version we build stays the version you run, until you choose to upgrade.

Upgrade policy

Odoo does not push automatic upgrades. No vendor does — this is normal, not a limit specific to us.

Our rule is simple: stay on your version until you choose to upgrade. When you do, we treat it as its own project, at a fixed price. We never roll upgrade costs into your monthly fee.

Here is how an upgrade works. First, we copy your live data to a test copy. Then we run the upgrade there, using OCA's proven upgrade tools where we can, or Odoo's official upgrade path where that fits better. We check the data and test everything. Only then do we move your live system over.

Result: your system stays stable between upgrades. You choose when to upgrade, and you know the cost before you say yes.

What you get in plain language

- **Listings and units.** Every property you manage, with status, project, location, and availability — visible to your whole team.
- **Leads and deals.** Every lead lands in one place, from any source. Once Phase 2 is live, your website leads land here too. Follow each lead through to a closed deal. See which agent is performing.

- **Tenancies, contracts, invoices.** Track rental income and contract terms. Get an automatic reminder before a contract expires — so you never miss a renewal.
- **Maintenance to invoice.** Log a repair request, price it, and turn it into an invoice — without typing it twice.
- **Reports and dashboards.** See your revenue, your properties, and your agents' activity at a glance — not buried in a spreadsheet.
- **Customer and vendor records.** Store your customers' and suppliers' tax details in the system, where they apply.

You and your agents can use this on your phone's browser. There is no separate app to install — see §07 for what is not included.

05 — How the subscription works

This is the answer to what you told us about budget. In plain words:

- Your full build is worth **AED 14,800**. We tell you this number up front. You will never see it as a separate invoice.
- At Kickoff, you pay **AED 4,900**. That is 33% of the build value. It covers the cost of starting the work, and it is non-refundable.
- We finance the remaining **AED 9,900** for you. You pay it back through your monthly fee, over 24 months.
- Your monthly fee is **AED 1,650**. Two parts make up this fee: AED 1,163 for the platform (hosting, backup, monitoring, patching, support, account management), and AED 487 to repay the financed build, plus a disclosed 18% financing cost.
- After 24 months, the build is fully paid off. Your fee stays the same and continues month-to-month. Either side can end it with 30 days' written notice — see MSA & SLA §A.14. The fee does not drop automatically once the build is paid.
- You pay AED 4,950 every quarter, in advance.

The 18% is the cost of us carrying that AED 9,900 for you, for 24 months. Want to skip it? Pay the AED 9,900 build value in full at Kickoff instead, and your monthly fee drops to just the platform part.

What the constraint bought you

On the call, you asked about AED 30,000 and AED 40,000 as upfront, one-time build costs. Either number would have used up cash you told us you want to keep free. This structure fixes that. Instead of a big cheque, you pay AED 9,850 at Kickoff — far less than the AED 30,000–40,000 you were quoted elsewhere. The table below shows the full comparison.

Upfront vs subscription (illustrative)

Structure	Payable at Kickoff	Then	Total over 24 months
Upfront build, then light platform fee	~AED 32,000 (build) + platform	Platform fee only	~AED 35,000 + platform
This proposal (subscription)	AED 9,850 (Mobilisation + Q1)	8 × AED 4,950 quarterly	AED 44,500

Yes, the subscription costs more in total over 24 months. That is because financing the AED 9,900 carries an 18% cost. But your Year 1 cash cost is lower. You are paying a known, disclosed price for the cash-flow room you asked for.

06 — What is included

- The build work described in §04, exactly as listed in the Order Form.
- Hosting for your Odoo system, managed by us. Provider and data location are stated in the Order Form.
- Daily backup.
- We monitor your system and patch security issues, within your pinned version.
- Two training sessions, 2 hours each, at Go-Live.
- 30 days of extra support right after Go-Live.
- Support under the service levels in §10 (full detail in the MSA & SLA, Part B).
- A business review every quarter.
- Mobile-friendly browser access for you and your team.

07 — What is not included

- **No app to download.** You use a mobile browser instead.
- **No Studio** (a drag-and-drop customisation tool).
- **Advanced accounting** — multi-currency, complex reconciliation, complex tax setup — is not part of this deal. Need it later? We scope and price it separately.
- **Major version upgrades** cost extra and are quoted separately.
- **Portal sync** (Property Finder, Bayut, Dubizzle), **website lead capture**, and **AI lead scoring** are Phase 2 — priced separately, see §12.
- **Your own subscriptions** — Property Finder, Bayut, domain, email, LinkedIn — stay your direct cost.
- Anything beyond §04's scope is a change request, billed at our rate card: Junior AED 350/hour, Senior AED 600/hour, Founder AED 850/hour.

o8 — Implementation plan

Milestone	Target	Deliverable
Kickoff (term and first invoice both start here)	Week 1 — target: within 30 days of this proposal's issue date	Mobilisation fee paid; RAID log opened; project plan agreed.
Discovery and requirements	Weeks 1–2	Validated process requirements; data-quality sign-off.
Configuration and migration	Weeks 3–5	Listings, leads, tenancies, contracts, invoicing, maintenance flow configured; historical data migrated.
Training	Week 6	Two sessions delivered to your named data-entry owner and the agent team.
Go-Live and 30-day hyper-care	Week 6 + 4 weeks	Go-Live criteria from §04 met; hyper-care issues resolved.
Quarterly business reviews	Every 3 months post-Go-Live	Operational review, sizing check, upcoming-scope discussion.

Client dependencies

Here is what we need from you: your data, in an agreed format, on time. One named point of contact for day-to-day decisions. Sign-off on testing and in-scope decisions within five business days.

If you are late, the timeline moves — by the same number of days you were late. Any service-level promise tied to that milestone moves with it.

o9 — Adoption commitment

This section exists because of what you told us: your last systems stopped being used within two months. We built this section to fix that. It works both ways.

- Within two weeks of Go-Live, you name one person responsible for using the system day to day.
- At day 30, we check real usage — deals, leads, contracts, invoices — against a target we agree together at Kickoff.
- If usage falls short by day 60, we run one free retraining session to fix it. No extra charge.
- Keep that named person in the role during the Initial Term. If they leave, give us two weeks' notice so we can prepare the next person.

This protects both of us from a rollout that stalls. We commit to actively helping your team use the system. You commit to having one person accountable for it.

10 — Service levels

Full detail lives in the MSA & SLA, Part B, signed alongside this proposal. Below is the short version.

Service tier — Growth

Item	Target
Monthly uptime	99.5% (excluding planned maintenance, force majeure, Client-caused issues, third-party outages, and periods of overdue invoices)
P1 — Critical (system unavailable or core process fully blocked)	2 business-hour response · 8 business-hour resolution target
P2 — High (major function impaired, workaround difficult)	4 business-hour response · 2 business-day resolution
P3 — Medium (minor function impaired, workaround available)	1 business-day response · 5 business-day resolution
P4 — Low (cosmetic / non-urgent)	2 business-day response · best-effort resolution

If we miss a service level, credits apply only to the platform part of your fee — never to the part repaying your build. Need after-hours Priority 1 cover? That is a paid add-on at AED 1,500/month, not included by default.

11 — Commercial summary

Figures — source of truth is the Order Form

Item	Value (AED)
Implementation Value (disclosed, never separately invoiced)	14,800
Mobilisation Fee, at Kickoff (33%)	4,900
Financed remainder	9,900
Financing uplift (disclosed)	18%
Recovery Component	487 / month
Platform Component	1,163 / month
Subscription Fee	1,650 / month
Billing	4,950 quarterly in advance
Initial Term	24 months from Kickoff
Target Kickoff	Within 30 days of this proposal's issue date (see §08, §13)
Upgrade policy	Version-pinned; major-version upgrades quoted separately as a fixed-price project (OCA-standard practice — see §04)
Payable at Kickoff (Mobilisation + Q1)	9,850
Year 1 total	24,700
Full 24-month commitment	44,500
Included users	3 (Growth tier)
Additional users	250 / user / month

Validity

This price is good for 30 days from the issue date on the cover page. After that, we re-check the numbers before confirming them again.

12 — Phase 2 and future options

These items are **priced now, but you are not committing to them today**. If you need one later, we quote it separately, at that time. One item you already asked about: adding agents at year-end. Each extra user beyond the 3 included in Growth is a flat **AED 250 per user, per month** — see the first row below.

Item	Reference price (AED)
Additional user, beyond the 3 included in Growth	250 / user / month
Portal sync, Property Finder + Bayut	6,900 one-time
Portal sync, Dubizzle (added with the above as scope permits)	included in above once Property Finder + Bayut are active
Website lead capture (request-brochure button wired to CRM)	2,400 one-time
AI lead scoring (Lite tier)	495 / month
After-hours Priority 1 support (paid add-on)	1,500 / month
Source-code escrow (optional)	6,000 / year

Portal sync needs a few things from you first: a valid RERA/DLD licence, your agency RERA ID, portal-side verification, and your own portal subscription with feed/API access. Our fee covers building the sync. Your portal subscription stays your own recurring cost.

13 — Next steps

1. Sign and return the **Order Form** (VGE-2026-SUB-01_OF).
2. SGC Tech AI issues an invoice for the Mobilisation (AED 4,900).
3. Once the Mobilisation is paid, your Initial Term starts. Target: Kickoff within 5 business days of payment.
4. Both sides sign the **MSA & SLA v2026.08** — the legal document that governs the deal. If this proposal and the MSA & SLA ever disagree on terms, the MSA & SLA wins. If they disagree on price, the Order Form wins.

This is a commercial proposal, not legal advice. Please have the MSA & SLA reviewed by UAE-qualified counsel before signing.

Acceptance and signatures

By signing below, both sides accept the deal in this proposal (§01–§13). SGC Tech AI can then start work on the Kickoff date. The legal terms sit in the Master Service Agreement and Service Level Agreement (SGC MSA & SLA v2026.08), signed alongside this proposal. The numbers in this proposal only bind us once they appear in the signed Order Form.
