Real Estate Growth Platform — Proposal

16 AUGUST 2026

Understanding Your Requirement

This proposal is scoped to the modules you selected, priced on a fixed product-plus-services basis rather than estimated build hours. Every commercial figure on the following pages traces to a governed catalogue entry — nothing here is a placeholder.

What This Delivers

CAPABILITY	INCLUDED
Platform (deployed system, first-implementation risk absorbed)	AED 14,000
Lead Capture Pipeline	AED 3,000

ODOO 19 COMMUNITY — VERSION LOCK. A DIFFERENT ODOO VERSION IS A SEPARATE ENGAGEMENT.

Scope & Acceptance

REQUIREMENT	ACCEPTANCE CRITERION
Lead capture	Inbound lead creates a CRM record within the platform, visible to an assigned user.
Property/listing management	A property record can be created, listed, and its status updated by an authorised user.
Commission & deals	A closed deal computes commission per the configured scheme and is visible on the deal record.
Multi-agent access control	Agent A cannot view Agent B's commission or deal records; record-rule enforced, not UI-hidden only.
Reporting & dashboards	Configured reports return live data from the modules above.

What Is Not Included — Named Directly

Not "coming soon," not bundled under a different name — genuinely not available to quote as a fixed line today. Each has a stated alternative.

CAPABILITY	STATUS	ALTERNATIVE OFFERED
Whatsapp Instant Notification	Not included	Email notification via the platform's existing SMTP path (see mail_mail evidence above for its current reliability, disclosed, not oversold).
Automated Call Logging	Not included	Manual call notes via the CRM's existing activity/message log (mail.activity 'Call' type, present but unused today).
Call Target Enforcement	Not included	Generic KPI dashboard rows (reporting_and_dashboards module) can surface whatever numeric field exists — but there is no call-count field to surface until call logging itself is built.
Biometric Attendance Hardware	Not included	Odoo's native manual/kiosk check-in, already active and evidenced as used — offered as-is, not oversold as hardware integration.
Property Portal Feeds	Not included	Manual listing export/upload to portals, or the client's own existing portal-sync tooling if any.

Commercial Summary

Platform fee (fixed)	AED 14,000
Modules (1)	AED 3,000
Migration (1,000 records ceiling)	AED 2,500
Total	AED 19,500

ALL FIGURES AED, EXCLUSIVE OF VAT (5% STANDARD RATE WHERE APPLICABLE). VAT: NOT CURRENTLY REGISTERED — NO VAT CHARGED (SEE BELOW).

ENHANCEMENT HOURS (OUT-OF-SCOPE REQUESTS BEYOND THE ABOVE): AED 550/HR, QUOTED PER REQUEST — NOT A BASIS FOR PRICING A WHOLE DEAL.

QUOTATION VALIDITY: [OPEN — NO POLICY.YAML VALUE EXISTS FOR A STANDARD VALIDITY PERIOD; SEE INTERNAL WORKSHEET.]

Payment Terms

Platform fee and modules due at kickoff. Migration (where priced) due on data-quality sign-off, before the configuration/migration phase begins. Enhancement hours invoiced per completed request.

Timeline

WEEK	MILESTONE
1	Kickoff
1-2	Discovery + data-quality sign-off
3-4	Configuration + migration
5	Training
5-6	Go-live
8	Hypercare

Client Dependencies & Assumptions

- [PRV] Source data for migration is clean and exported in a supported format by the data-quality sign-off date.
- [PRV] A named client contact is available for discovery and UAT.
- [PRV] Client holds any third-party accounts (portals, email) required for integrations in scope.

Change Control & Acceptance

Any change to scope after acceptance is a standalone change-control instrument — a new signed line item, not a verbal variation to this document.
